Summary

Backend Developer building REST APIs and real-time systems with **Node.js**, **Express**, **NestJS**, and **Python/FastAPI**. Hands-on with PostgreSQL, MongoDB, JWT/RBAC security, background jobs (Celery, Redis), Docker, and CI/CD with GitHub Actions. Projects include an AI-powered car management platform and a team project management API. Focused on clean architecture, automated testing, and secure API design.

Skills

Languages: JavaScript, TypeScript, Python, Java, SQL

Runtime & Frameworks: Node.js, Express.js, NestJS, FastAPI

APIs & Real-Time: REST, GraphQL, Socket.IO

Databases & Caching: PostgreSQL, MongoDB, Redis, SQLAlchemy, Alembic

Auth & Security: JWT, Refresh Token Rotation, Argon2, RBAC, Rate Limiting

Testing & CI/CD: Pytest, Ruff, GitHub Actions

DevOps & Tools: Docker, Docker Compose, Git, GitHub, Postman, Swagger, Cloudinary, Render, Vercel

Backend Concepts: Layered Architecture, Background Jobs (Celery), Caching, Pagination, File Uploads, Error Handling

Projects

TeamFlow | *FastAPI, PostgreSQL, SQLAlchemy, Alembic, Redis, Celery, Docker, Pytest* **Oct 2026 – Nov 2026**

- Built a Trello/Jira-like REST API with 9 modules and 40+ endpoints (teams, projects, tasks, notifications).
- Implemented JWT rotation, Argon2id, per-team RBAC, and row locking (`FOR UPDATE`) against race conditions.
- Wrote 120+ Pytest tests with a GitHub Actions CI pipeline (Ruff, Alembic checks); Celery for background emails.
- **GitHub:** github.com/KhaledAli1234/teamflow

Auto Care | *NestJS, React Native, Flask, MongoDB, Socket.io, Docker, JWT* **Feb 2026 – Jul 2026**

- Built the NestJS backend for an AI-powered car management platform with JWT authentication and RBAC.
- Built vehicle, maintenance, fuel-log, and GPS trip modules, plus support tickets and Socket.io notifications.
- Integrated a Flask/Groq AI assistant microservice; containerized all services with Docker.
- **GitHub:** github.com/KhaledAli1234/Auto-Care

E-Commerce Backend | *NestJS, Node.js, MongoDB, GraphQL, Socket.io, JWT* **Oct 2025 – Nov 2025**

- Developed a modular backend for product management, shopping cart, and order processing.
- Added GraphQL alongside REST APIs for flexible data querying.
- Implemented JWT authentication and real-time order updates via Socket.io.
- **GitHub:** github.com/KhaledAli1234/Ecommerce-Nest

Social Media Backend | *Node.js, Express, MongoDB, GraphQL, Socket.io, JWT* **Sep 2025 – Oct 2025**

- Built a REST API with JWT authentication and role-based authorization.
- Implemented posts, comments, likes, and a follow/unfollow system.
- Integrated Socket.io for real-time notifications.
- **GitHub:** github.com/KhaledAli1234/Social_App

Saraha App Backend | *Node.js, Express, MongoDB, JWT, Redis* **Aug 2025 – Sep 2025**

- Built an anonymous messaging backend with JWT authentication and inbox management.
- Designed RESTful APIs for message delivery, retrieval, and account management.
- Used Redis caching to reduce database load and improve response time.
- **GitHub:** github.com/KhaledAli1234/Sara7a_App

Education

Cairo University – Faculty of Science **Sep 2022 – Jan 2027 (Expected)**

Bachelor of Science in Computer Science *Cairo, Egypt*

Relevant Coursework: Data Structures, OOP, Computer Networks, AI, Compilers

Route Academy **May 2025 – Nov 2025**

Backend Web Development Diploma *Cairo, Egypt*
